Letter of Recommendation

23 June 2014

To whom it may concern

The SciConf software has been successfully applied to a series of scientific conferences, organized by the Union of Chemists in Bulgaria as well as by joint members. Among them are: Seventh European Congress on Catalysis, EuropaCat-VII (28 Aug – 1 Sept 2005, Sofia), XVII EuCheMS Conference on Organometallic Chemistry (1–6 Sept 2007, Sofia), Tenth International Symposium on Heterogeneous Catalysis (23-27 Aug 2008, Varna), Sixth International Conference of the Chemical Societies of the South-eastern European Countries, ICOSECS-6 (10–14 Sept 2008, Sofia), Seventh National Conference on Chemistry (26–29 May 2011, Sofia), Eighth National Conference on Chemistry (26–27 June 2014, Sofia), etc. The number of participants in these scientific events varied within 200–900 registered persons. The software operated very well during registration, abstract submission, abstract evaluation, and e-mail correspondence. If necessary, the team of workers was ready to make proper changes in the software, according to specific requirements of every event.

I recommend the SciConf software to any conference organizer.
